BYOT · BUILD YOUR OWN TECHNOLOGY

JECKY

One smart platform for campus communication, navigation and collaboration

Pritam Saha · Oisik Gogoi | Computer Science & Engineering, Jorhat Engineering College

THE PROBLEM

Campus life runs on WhatsApp chats

01

Buried updates

Class changes, notes and event notices get lost in chats within hours.

02

CR overload

Every student asks the CR about every small thing, pulling focus from their own studies.

03

Lost freshers

New students can't find classrooms, labs or buildings and depend on seniors.

THE SOLUTION

One platform, built around our campus

Dynamic Timetable

Teachers edit or cancel a class; students see it instantly.

Notes Section

Study material shared by teachers, organised by class.

Events Hub

Club admins and faculty post events to the homepage.

Clubs

Every club with its description and member list.

Faculty Directory

Contacts of key faculty and the HoD in one place.

AI Campus Guide

Ask where a place is and get the route in plain language.

HOW IT WORKS

Four elements, one source of truth

1

Role-based accounts

Student, teacher, club admin or administrator, each with its own permissions.

2

Live timetable

Edits and cancellations reach students the moment they happen.

3

Information hubs

Notes, events, clubs and a faculty and HoD directory.

4

AI campus guide

Understands plain questions and shows the route to any place.

Example: a teacher cancels the 10 AM class and every student sees it instantly. No message to the teacher, no query to the CR.

ACCESS CONTROL

Four roles, clear permissions

Student	Checks timetable and class status, downloads notes, browses events and clubs, asks the AI guide.
Teacher	Edits, reschedules or cancels classes, uploads notes and posts events.
Club admin	Presents the club and its members, and posts events to the homepage.
Administrator	Publishes verified information and keeps faculty and HoD contacts current.

WHY JECKY

WhatsApp today vs JECKY

NEED	TODAY	WITH JECKY
Will the class be held?	Ask the teacher or the CR	Live status, no one to ask
Timetable changes	Forwarded screenshots	Teacher edits it directly
Study notes	Scattered across chats	One notes section
Events and notices	Buried in group chats	Homepage events feed
Finding a classroom	Ask seniors or wander	AI shows the route

TECHNOLOGY

A modern, scalable stack

FRONTEND

React.js

Fast, responsive web interface.

BACKEND

Node + Express

APIs for every module.

DATABASE

MongoDB

Flexible, growing data.

AI

In-house guide

Built by our team.

SECURITY

Auth + roles

Server-side access checks.

Modular by design: it grows as more features and users are added.

Impact and what's next

Expected impact

- Fewer repeated messages to teachers and CRs
- Reliable, up-to-date info in one place
- Freshers settle in faster
- Clubs and events get campus-wide visibility

Future roadmap

- Android and iOS apps
- Smart notifications and email alerts
- Voice, local languages, indoor navigation
- Exam schedules, analytics, multi-college support

One place for every student, teacher and club. Thank you!
